

2022 AZOA Fall Congress

November 18 - 20

Hilton Sedona Resort at Bell Rock

Join us for 14 hours of COPE-approved education &
our popular exhibitor hospitality suites on Saturday
night!

Enjoy Sedona

FRIDAY, NOVEMBER 18

9:00am Dr. Bruce Bridgewater Memorial Golf Tournament at Sedona Golf Resort

12-5pm Registration (please note that registration doesn't open until 12pm)

1-3pm Utilizing Diagnostic and Therapeutic Advancements to Effectively Manage Ocular Surface Disease/Cunningham/PENDING

The causes of ocular dysfunction related to dry eye are often multifactorial and rarely self-limiting. Inflammation, infection, and degeneration are often variable concerns in the treatment and management of dry eye. Historical treatments have been based solely on the symptomatic presentation of dry eye and not on basic science research. New understandings of the pathophysiology of dry eye have to lead to dramatically different treatment options. Diagnostic capabilities and new therapeutic options will be a basis for choosing the most effective treatment for presenting patients. New strategies and treatment options will be highlighted.

3-4pm The Holy Grail in Presbyopia Management/Cunningham/PENDING

This course will explore current and future technologies aimed at alleviating the limitations of presbyopia. Surgical, pharmaceutical, and neurological treatments will all be explored.

4-5pm Cosmetometry A New Wrinkle for Optometry/Cunningham/PENDING

This course will provide an overview of the world of facial aesthetics and how it relates directly to the eye. Medical, functional and cosmetic ocular interactions will be discussed in detail. Implementation strategies for treatment and management will be discussed.

5pm Dinner on Own

SATURDAY, NOVEMBER 19

7:00am Registration/Breakfast
- Please arrive at 7am for breakfast

8-9am Nope, That's Not Just Dry Eye: Other Corneal Diseases/Koetting/78331-TD

The cornea is the window of the eye. When it becomes compromised patients are unable to see clearly. Dry eye disease is one of the most common problems of the cornea, however it is not the only one. This lecture will discuss other common corneal diseases that should be managed to help maintain the health and clarity of the cornea.

9am-10am Friday at 5 Grand Rounds Ocular Emergencies/Koetting/PENDING

Think you're about to walk out that door and enjoy your weekend. Think again. It's Friday at 5 and of course this walks into your office, an ocular emergency. Now what? Within this course we will talk about the 6 different ocular emergencies and how to handle them.

10am-11am Is It Glaucoma or a Masquerader/Koetting/78332-GL

When evaluating new patients to your practice or a previous patient, it is important to monitor optic nerve changes. When we see RNFL thinning and/or visual field loss, we know we need to treat the patient for glaucoma. But what is the true underlying etiology? In this lecture we will explore the diagnostic and management differences between primary open angle and low tension glaucoma versus secondary glaucoma and other ONH changes.

11am-12pm Demodex Diaries/Koetting/76539-TD

When is blepharitis not JUST blepharitis? Demodex is a tiny mite that occurs on our skin and lives within our hair follicles, including on our eyes. Ocular infestation can cause all sorts of complaints from patients. It is important to know how to identify these bugs and how to control them. Join me as we discuss the Demodex Diaries.

12-2:30pm AZOA Membership Meeting/Lunch

3-5pm Clinical Discussions in Glaucoma/Steen/76415-GL

This course will discuss diagnostic and management challenges encountered in clinical practice in a case-based, interactive format. The diagnosis and management of secondary glaucomas, detection of progression, and optimization of the use of ancillary technologies will be highlighted.

5:00pm Dinner on Own

7-10pm Hospitality Suites

Come enjoy an AZOA signature event, network with colleagues, and experience the latest and greatest from your favorite vendors in a fun and relaxed atmosphere!

SUNDAY, NOVEMBER 20

7:00am Registration/Breakfast
- Please arrive at 7am for breakfast

8-9am When Good Retinal Surgery Makes Glaucoma Go Bad/Steen/76054-GL

This course will discuss the management of glaucoma in patients who have undergone vitreoretinal procedures. The likelihood of development of glaucoma is increased following surgical management of vitreoretinal disease including pars plana vitrectomy, and intravitreal injections of gas, silicone

oil, steroid, and anti-VEGF agents and therefore these individuals require special consideration. Using case examples, this course will discuss underlying cause of elevated intraocular pressure and glaucoma in patients who have undergone vitreoretinal procedures and will highlight treatment pearls and management considerations.

9-10am Practical Management of Ocular Pain/Steen/78100-PH

This course will update prescribers on the pharmaceutical management of ocular pain using opioid and non-opioid medications. Adverse effects of opioid use, signs of misuse, and treatment of opioid overdose will be highlighted.

10am-11am Idiopathic Intracranial Hypertension/Subei/PENDING

11am-12pm Ocular Myasthenia Gravis/Subei/PENDING

2022 FALL CONGRESS FACULTY

Dr. Derek Cunningham's advanced research cover a vast spectrum of eye care and neuroscience including; dry eye treatments, glaucoma medications and surgeries, retinal disease, cataract and lasik surgeries, cosmetic treatments and products, vision enhancement and sports vision. His innovative research has been presented at all major meetings ranging from the American Retinal society, the Academies of Ophthalmology and Optometry, to the American College of Sports Medicine. His research has been featured in many medical journals and showcased in publications such as Sports Illustrated and Forbes Magazine. In addition to having been an associate professor at Texas Tech School of Medicine, Dr. Cunningham also held adjunct professor status at the Inter American University of Puerto Rico and University of Waterloo, University of Houston, and University of Incarnate Word. Dr. Cunningham is an internationally recognized educator, having provided continuing education lectures to eye doctors throughout the world. He is also a Fellow of the American Academy of Optometry and is board certified by the American Board of Optometry. He is also the director of the Dry Eye Institute at Dell Laser Consultants (DLC) and is well published in the areas of advanced dry eye treatments and facial aesthetics.

Dr. Cecelia Koetting practices at the MD/OD practice Hines Sight in Denver, CO. Her primary focus is in anterior segment and ocular surface disease, neuro-optometry, and peri-operative care. Dr. Koetting is fellow in the American Academy of Optometry, a diplomate of the American Board of Optometry, active member of AOA and has served as both local and state officers in AOA. She was named young Optometrist of the year in 2019 by the state of Virginia, receiving the Vanguard of the Year Award. Dr. Koetting lectures locally, nationally and internationally at conferences and has written for multiple publications.

Dr. Jessica Steen is an Assistant Professor at Nova Southeastern University College of Optometry where she serves as Director of the Glaucoma Service and as an attending optometric physician at the College's Eye Care Institute. Dr. Steen teaches the course in glaucoma and ocular pharmacology at NSU. Dr. Steen also serves as the Primary Care with Emphasis in Ocular Disease Residency Coordinator. Dr. Steen graduated from the University of Waterloo School of Optometry and Vision Science and completed her residency in Primary Care with Emphasis in Ocular Disease at Nova Southeastern University. Dr. Steen's main clinical interests include glaucoma, retinal disease, neuro-ophthalmic disease with an emphasis in medical and surgical management. Dr. Steen's research interests are centered on artificial intelligence applications in the management of glaucoma. She is a Fellow of the American Academy of Optometry, a Diplomate of the American Board of Optometry, member of the Optometric Glaucoma Society, and currently serves as Chairman of the Board of the Palm Beach County Optometric Association.

Dr. Obada Subei obtained his doctorate in medicine at the University of Illinois at Chicago. He pursued his interest in Neurology at the University of Arizona at Phoenix and completed a fellowship in the rare field of Neuro-Ophthalmology at Michigan State University. Dr. Subei is well known for his compassion for his patients. He has dedicated his career to helping people maintain their vision and treat those with rare and unique disease entities unknown to many physicians. He is always advocating for his patients well being. We will be happy to welcome new patients who might benefit from neuro-ophthalmic care. He is currently the only Neuro-Ophthalmologist able to see new patients within 1-2 weeks in the Valley.
